

# Flow sensor type 212 for liquid media with display

Flow range  
0.5 ... 150 l/min

Nominal diameters  
DN 6 / 8 / 10 / 15 / 20 / 25

Temperature measurement  
-20 ... +85 °C

The flow sensor type 212 is based on the Vortex trail principle. This flow sensor convinces due to the additional digital indicating device which shows the flow rate and the media temperature. The type 212 is available with and without temperature measurement.

With no moving parts the flow sensor is not sensitive to debris, has marginal pressure loss and high accuracy.

- Flow measuring with immediate display of flow measuring range and medium temperature
- Temperature non-sensitive flow measuring principle
- Excellent media resistance (measuring element not in contact with the media)
- CE conformity
- Wide application temperature range
- Marginal loss of pressure
- Measuring element not sensitive to debris
- Direct temperature measurement in the medium
- Drinking water approval

## Tube mounting instructions

Consider the following to ensure the correct function of the sensor.

- Only diameter changes from large to small are allowed.
- Avoid repeated elbows in the same level at entryside

## Electrical connection

Pin 3 - not connected

Connect pin 1 and pin 4 to ensure the power supply of the internal electronic.
